

AQUA ADS – Eco advertising

Title	AQUA ADS
Description of the technology	<p>The Czech start Aqua Ads is coming with advertising technology friendly to environment.</p> <p>Thanks to an unique technology Aqua Ads offers creation of advertising inscriptions and slogans on pavements and roads through a water ray that consumes only a little of water. It is a very interesting alternative and ecological solution to classic outdoor advertising. The paintings and inscriptions are created by its own special machine.</p> <p>This machine works much like a high pressure washer. Eco advertising will last about 3 months. Technological difficulty and their beneficial activities in the public space allow them to obtain all the necessary permits for the application of Aqua Ads</p>
Keywords	Water advertising, Wastewater cleaning
Advantages	<p>The goal of the Aqua Ads is to improve the environment of the cities through less annoying and more environmental-friendly advertising.</p> <p>This start-up promotes a simple, elegant, artistic design that does not require paper, dyes or chemicals.</p>
Stage of Development	Sale to end-user Finished product available to use since 1.2.2016
Language of communication	English, Czech, Slovak,
