

RESPIRO - „Green design for a better future“.

RESPIRO - „Green design for a better future“	
Description	<p>RESPIRO is a company that manufactures design products from used and recyclable materials. “We are looking for and we will never give up! We collect used materials from cycle shops, printers, carpets and winemaking to create unique, practical, environmentally friendly products. This eliminates the production of an endless amount of disposable packaging material. For our products, it is actually such a lifetime! Help us and yourself, send us used banners, bantex banter billboards, truck tarpaulins, or used bicycle souls. This will help us to create more upcycled products.”</p> <p>The catalog of RESPIRO products is available here</p>
