

# Constructed wetland

Title	Constructed wetland
<p><b>Description</b></p>	<p>Constructed or treatment wetlands are eco technologies, used for wastewater treatment. Application could be used for treating all kind of wastewater treatment and is mostly used for municipal wastewater treatment. System is very robust and is using no or very low energy for efficient wastewater treatment.</p> <p>During the development and prototypes, we manage to optimise it so less space is needed. If in the past we needed 3 m<sup>3</sup>/PE, now it is possible to treat wastewater on 0,3 m<sup>3</sup>/PE.</p>
<p><b>Segment of eco-technology</b></p>	<p>Water cleaning</p>
<p><b>Form of cooperation</b></p>	<p>Sale to end-user</p>
<p><b>Company</b></p>	<p>Aquaplant d.o.o.</p>
<p><b>Contact point</b></p>	<p>niko.natek@kssena.velenje.eu</p>
<p><b>Website</b></p>	<p><a href="http://www.aquaplant.si">www.aquaplant.si</a></p>
<p><b>Country</b></p>	<p>Slovenia</p>
<p><b>Notice</b></p>	<p><i>Project co-funded by European Union funds (ERDF and IPA)</i></p>
