

Constructed wetland

Title	Constructed wetland
Description	<p>Constructed or treatment wetlands are eco technologies, used for wastewater treatment. Application could be used for treating all kind of wastewater treatment and is mostly used for municipal wastewater treatment. System is very robust and is using no or very low energy for efficient wastewater treatment.</p> <p>During the development and prototypes, we manage to optimise it so less space is needed. If in the past we needed 3 m³/PE, now it is possible to treat wastewater on 0,3 m³/PE.</p>
Segment of eco-technology	Water cleaning
Form of cooperation	Sale to end-user
Company	Aquaplant d.o.o.
Contact point	niko.natek@kssena.velenje.eu
Website	www.aquaplant.si
Country	Slovenia
Notice	<i>Project co-funded by European Union funds (ERDF and IPA)</i>
