

Ecological dyes for textiles

Category	Biotechnology
Description of ecotechnology	<p>We produce textile dyes using natural occurring bacteria. Our mission is to match technology and design.</p> <p>Bacteria has an enormous beneficial quality which Vienna Textile Lab is able to turn into one of the most beautiful things in the world - COLOR.</p> <p>Vienna Textile Lab fabricates organic colors made by naturally occurring bacteria in order to provide the most sustainable, wholesome and environmentally friendly alternative to conventional synthetic colors. Using Vienna Textile Lab colors to dye your textiles means to act responsible and thoughtful.</p>
Offer of ecotechnology	<p>We help designers use new type of materials, methods and concepts in the textile business. Vienna Textile Lab makes dyeing go easy on human and ecological resources.</p> <p>Questions: contact us or visit http://www.viennatextilelab.at/faq/</p>
