

Municipal waste

Tittle	<p>Geocycle Bulgaria Geocycle is a leading provider of industrial, agricultural and municipal waste management services worldwide. We apply the proven technology of 'co-processing' and utilize existing facilities in cement industry to resolve waste challenges sustainably. This enables us to recover energy and recycle materials from waste. We contribute towards a regenerative, circular economy that closes resource cycles. Geocycle manages more than 10 million tons of waste annually, thus making a tangible contribution to bringing society a step closer to a zero-waste future.</p>
--------	--

<p>Technology deployment</p>	<p>Today, Geocycle Bulgaria operates 2 shredding halls to pretreat a fraction derived from municipal waste. It has own used tires collection and animal meal transportation. Our pre-processing facilities are located in Beli izvor village, Vratza region.</p> <p>Our experts are offering you the highest level of services in all areas of waste management. Our success stems from our responsiveness to your business needs, as well as the needs of the environment. We apply the strictest standards to ensure the safety of the environment.</p> <p>Whatever your challenge may be - we are looking forward to support you with our outstanding expertise and network of global specialists!</p> <p>Since 2007, more than 20 million EUR have been invested in waste management facilities: 2 SRF (solid Recovered Fuels) shredding lines, used tires automatic feeding, animal meal transport & feeding, chlorine bypass installation.</p> <p>.</p> <p>Since 2005, Geocycle Bulgaria has been offering waste management services and co-processing solutions in cooperation with Beli Izvor Cement plant.</p> <p>.</p> <p>Almost 100 000 tons of waste collected & pre-processed by Geocycle Bulgaria in 2017 - mainly SRF from sorted municipal waste, non-hazardous industrial solid waste, animal meals, used tires.</p> <p>.</p> <p>More than 90.000 tons of waste were co-processed in our cement kiln in 2017.</p> <p>.</p> <p>36 dedicated people are running all Geocycle activities - 2 pre-processing platforms, market & sales, logistics, laboratory.</p>
