

Mobile plug-and-play plant direr for accessible and fast drying process

Title	Mobile plug-and-play plant direr for accessible and fast drying process
Description of the technology	<p>Portable dryer is unique product on the market because it enables the operator full versatility and an easy use in any place. Many of aromatic plants, medicinal plants or spice growers are dispersed in small parcels and cost of transportation of materials to the drying place is huge, furthermore, material transportation, storage and start of drying must be done in a very short period of time due to the fact it can start quickly to rotten.</p> <p>In general, there is a distinct tendency towards environmentally-conscious behaviour and ecological production, where medicinal and aromatic herbs play a special role, as they are - compared to intensively produced mass grains and livestock breeding for meat - is a much more environment-friendly and less water-consuming activity that also helps restoring traditional plant culture in the countryside.</p>
Keywords	Mobile plug-and-play plant direr
Stage of Development	Sale to end-user Finished product available to use since 1.12.2018
Language of communication	English, Hungarian
